## ZINGA

ANTI-ROESTBESCHERMING  
PROTECTION ANTI-ROUILLE

**Kunt u de Eiffeltoren verzinken... zonder hem te demonteren? Een rare vraag misschien en u denkt allicht dat het niet mogelijk is. Nochtans, kan het met**

ZINGA anti-roestbescherming door filmverzinking: een actieve bescherming voor alle ferro-metalen door het aanbrengen van een galvaniserende film, die electro-chemisch reageert met zijn metalen ondergrond. Voor bescherming van uw installaties, voertuigen, vaartuigen, masten, ketels, silo's, golfplaten, hekken, verwarmingsbuizen, containers, enz... Eenvoudig aangebracht als een verf! Heeft een beschermend karakter, vergelijkbaar met thermisch verzinken.

[Documentatie op aanvraag](#)

***Pourriez-vous galvaniser la Tour Eiffel... sans la démonter?  
Question rare sans doute et probablement impossible selon vous.  
Pourtant, c'est possible avec***

*ZINGA protection anti-rouille par film galvanisant: une protection active de tous les métaux ferreux, grâce à l'application d'un film galvanisant qui provoque une réelle action électro-chimique avec son support métallique. Pour protéger vos installations, véhicules, bateaux, containers, pylônes, chaudières, silos, tôles ondulées, clôtures, tuyaux de chauffage, etc... Simple comme une peinture! Montre un pouvoir protecteur, comparable à celui d'une galvanisation à chaud.*
